Education

Pulchowk Engineering Campus, TU BE in Computer Engineering	2023-Present 5th Sem
Himalayan Whitehouse International College +2 in Computer Science	2021-2023 3.86/4.0
Shree Gyanodaya Secondary School Primary School	2021 3.85/4.0

Projects & Freelance

Sikshya Kendra | *Freelance*

[Link](#)

- Developed an educational platform offering online courses, in-app tutoring, and live classes.
- Designed a comprehensive resource hub to help students streamline their educational goals.

GPT-3 From Scratch | *Python, PyTorch, LLM*

[Link](#)

- implemented a custom 355 parameter Transformer architecture featuring multi-head self-attention and positional encoding based on the "Attention is All You Need" paper.
- Optimized training loops using vectorized operations in PyTorch, significantly reducing loss over 10k iterations.

Youtube Video Chat | *RAG-based QA over Transcripts*

[Link](#)

- Developed an application to chat with YouTube videos using Retrieval-Augmented Generation (RAG).
- Ingests video transcripts, builds vector embeddings, and enables conversational Q&A over video content.

Room-Bazar | *MERN Stack*

[Link](#)

- Digitalized the room searching process for major Nepali cities like Kathmandu and Pokhara.
- Implemented secure authentication using cookies and integrated real-time booking and messaging.
- Built a responsive UI that improved UX for room seekers through advanced filtering and live updates.

TentSewing Website | *Freelance*

- Developed a professional business site for Nepal Tent Sewing Enterprises.
- Built a dynamic product catalog, service listings, and a functional contact system.

Tweet-Tube | *MongoDB, Express.js*

[Link](#)

- Engineered a robust backend combining features of Twitter and YouTube into a single API.
- Conducted extensive API testing and documentation using Postman.

Certificates

- **Instructor**, Software Fellowship Program (Pre-Event of Locus 2026).
- **Hack-A-Week Finalist**, Locus 2026.

Skills

Languages: JavaScript (ES6+), Python, SQL, Bash Shell Scripting
DevOps & CI/CD: GitHub Actions, Docker, Kubernetes (k8s), Appwrite
Backend & Tools: Node.js, Express.js, MongoDB, Git, Postman, LaTeX
Methodologies: Agile, RESTful API Design, Rapid Prototyping
